Our Boot Camp Learners Are in Demand

Our employer-competitive learners have received job offers from thousands of global organizations. As you take the next steps in your career, you'll have exclusive access to job referrals from **our network of 250+ partners.**

Further Your Career

Our Career Engagement Network will help you apply the tools and knowledge you learn in your program to advance your career by assisting you in developing a strong **portfolio**, a polished **resume**, and sharp **interview skills**. You'll also have access to free career resources throughout your professional life.

Innovative Curriculum. In-Demand Skills.

The rigorous boot camp curriculum is delivered through high-quality coursework and live, online classes led by instructors who are fully vetted by the university. All instructors are assessed for not only their experience in the field, but also their ability to successfully communicate coding concepts to students in an online environment. Instructors are dedicated to delivering a quality curriculum and to enhancing the learning experience of their students; they also offer 1-on-1 guidance to learners throughout the program.

Build a Foundation

Learn fundamental concepts of web development, including HTML, CSS, and JavaScript.

Portfolio Project: Build a client-side application using third-party APIs.

Develop Technical Expertise

Learn Performance

Now You're Ready

By the time you complete the boot camp, you will have mastered in-demand skills, built an impressive portfolio of coding projects, and earned a valuable Certificate of Completion from one of the country's most prestigious universities.

What Boot Camp Alumni Are Saying:

"The Coding Boot Camp was a great experience. It not only taught me the knowledge and skills needed for web development, but gave me the leg up that I needed to change my career. I specifically chose Case Western Reserve because of the university's accreditation and due to the fact that it was 6 months. (...) It has allowed me to change career paths from one that was stagnant and monotonous, to one that is challenging, intriguing and rewarding." —

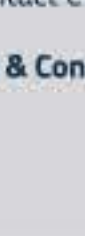

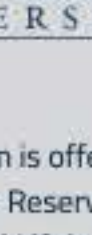

Matthew K.

What Boot Camp Alumni Are Saying:

”

“The Coding Boot Camp was a great experience. It not only taught me the knowledge and skills needed for web development, but gave me the leg up that I needed to change my career. I specifically chose Case Western Reserve because of the university's accreditation and due to the fact that it was 6 months. (...) It has allowed me to change career paths from one that was stagnant and monotonous, to one that is challenging, intriguing and rewarding.” – **Matthew K.**

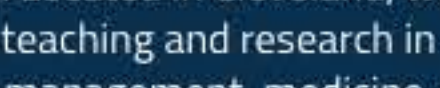

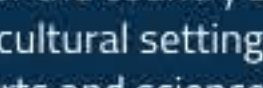

”

“CWRU [Coding Boot Camp] and its instructors gave me the curriculum and resources I needed to really understand modern web development on both sides of the stack. (...) I set a goal to become a web developer before turning 27. I knew the effort required would be taxing—but the reward would pay off and point me where I wanted to go in life. CWRU is the core reason I was able to achieve this goal, and I couldn't be more thrilled to officially start my career as a software engineer.” – **JJ D.**

”

“Although, for me, the Coding Boot Camp led to the opportunity to launch my own tech startup rather than apply for IT jobs straight away, I can nonetheless say that I found the Career Service an excellent experience, which did reorient me from the healthcare to the IT job market, and gave me a lot of invaluable help and advice along the way.” – **Matthew H.**

A Powerful Educational Partnership
